**Dutch Boy**  
**Refresh**

Quality paint  
from the brand  
you trust.

The Dutch Boy® Group brings you great quality and durability with Refresh® paint. Together with Arm & Hammer® technology, Refresh® paint contributes to the reduction of odors and the creation of a more beautiful environment. It's ideal for virtually every room in your house.

- Scrubbable, durable finish
- Arm & Hammer® odor eliminating technology
- Exceptional application: self-priming
- Mildew-resistant coating

- Available in Flat, Eggshell, Satin and Semi-Gloss finishes
- Zero VOCs\*\*/low odor
- GREENGUARD® Indoor Air Quality Certified® Product
- Limited Lifetime Warranty

**The color of your room should turn heads. Not the odor.**

**How does it work?**

Refresh® paint contains proven odor eliminating technology. Through natural airflow, the odor vapor molecules come in contact with the walls and are captured and locked within the paint film. Scrubbing the painted surface will not release the odors.

**The paint with low environmental impact.**

The Dutch Boy Group is committed to lessening the impact we have on our environment. That's why we created Refresh® paint, the first top-quality paint with Arm & Hammer® Odor Eliminating Technology and Zero VOCs\*\* — which means you can also enjoy your room immediately after painting.

Did you know ... VOC stands for "Volatile organic compounds." These are vapors released from paint as it dries and are thought to contribute to smog and poor air quality. Refresh® paint is formulated without VOCs—one step closer to having less environmental impact.

**Beautiful colors available in every shade of "green."**

You want products that minimize the impact on the environment. And you want to trust that the products have been approved by a credible party. That's where the GREENGUARD® Environmental Institute comes in. An industry independent, third-party program, it ensures the products it tests meet or exceed acceptable indoor air standards and it is recognized by architects, designers, purchasing organizations and consumers. Dutch Boy® Refresh® has been tested and certified by GREENGUARD®.

**VOC** (Volatile Organic Compounds) is a measure of the amount of organic solvents in a paint. VOCs are regulated by the U.S. Environmental Protection Agency (EPA) and are a key factor in determining the health and environmental impact of a paint. Dutch Boy paints are formulated to meet or exceed the most stringent VOC regulations.
